by 1,35 for HF-5 fluids.

by 1,10 for ester or rapeseed base

Use the cartridge with the highest absolute pressure for double pumps.

**Internal leakage (typical)**

Do not operate pump more than 5 seconds at any speed or viscosity if internal leakage is higher than 50% of theoretical flow. Total leakage is the sum of each section loss at its operating conditions.

**Noise level (typical)  
 SDV2020 - 13 - 11**

Double pump noise level is given with each section discharging at the pressure noted on the curve.
